

**SEED SCIENCE LAB  
DEPARTMENT OF BOTANY  
UNIVERSITY OF PERADENIYA**

# “Evolutionary aspects of physiological dormancy”

**By Professor Carol Baskin**

**Biography:** Professor Carol Baskin has made an enormous contribution to the field of seed biology. She is currently attached to the Department of Biology and the Department of Plant and Soil Sciences at the University of Kentucky (USA). Her research is focused on seed germination ecology, biogeography and evolution of seed dormancy and germination. She is interested in the ecological life history of plant species, especially the seed germination stage of the life cycle.

**Meeting ID: 873 5480 4726  
Passcode : rUH3VC**

**Date : Tuesday, 7<sup>th</sup> December 2021  
Time: 6.30pm (Sri Lanka)**

A photograph of several small green seedlings with two leaves each, growing out of dark brown soil. The background is a soft, out-of-focus green.
