About Me

I graduated from University of Kelaniya in 2012 with honors degree in Physics. In 2013, I joined the Department of Physics, University of Peradeniya as a Probationary Lecturer. In 2014 I went abroad for my PhD. I obtained my PhD from Kansas State University in 2019 and my PhD research project is "Search for vector-like T quarks using events with oppositely-charged lepton pairs and jets in proton-proton collisions at centre-of-mass energy of 13 TeV with CMS detector". Currently I'm working as a Senior Lecturer at the Department of Physics, University of Peradeniya.
